

BillQuick Web Suite 2015 Update Log

Build 16.0.10.5

Release Date: May 10 2015

1. Invoice Review: Invoice Number drop down was not working properly. – FIXED
2. Activity Screen: While using navigation buttons in edit mode when user updated the changes to an activity, it would save the changes incorrectly to the previously saved activity instead of the currently viewed activity. - FIXED
3. Time Entry – Change Feature: When memo or bill rate is updated, the classification is reset to null value - FIXED
4. Grouping Screen: Searching capability was not displayed. - FIXED
5. Billing Schedule: On saving the date value was set to Today's date. - FIXED
6. Reviewer Screen: On opening memo for the entry, close (x) button was not properly aligned due to which memo screen could not be closed. - FIXED
7. Time and Expense Screens: Custom Labels Custom list UI type drop down were not aligned properly due to which user were not able to select the values. - FIXED
8. Report Center: When memorized report names were long they will overlap on the filters and thus not allowing the user to select filters. – FIXED
9. Report Center: Discrete filters were missing. – FIXED
10. Chart of Accounts: Opening balance field was hidden. - FIXED
11. Expense Code / Expense Log: Expense Cost was rounding to 2 places of decimals. This caused rounding issues and inaccurate values - FIXED
12. Payment Screen: On opening when View By is set to Invoice Number, the type ahead list does not display invoice numbers. – FIXED
13. Payment Screen: When user pays invoices and continues the session to apply another payment, the page becomes unresponsive and does not save Payment screen. – FIXED
14. Simple Time Card/ Simple Expense Log: When user has View by Project Name options checked, Project Control was not applied properly for Activity/Expense List. - FIXED
15. Simple Time Card: Using copy and paste feature when time is copied from one week to another week and show memo is option visible. Before saving, user modifies Hours and then saves. In this case only updates A-Hours is modified and B-Hrs saves with original value that was copied from. - FIXED

16. Groups: User were able to create group id with apostrophe character. This resulted in error message. – FIXED
17. Invoice Review: Clicking or selecting invoice number, project id or client id in the type ahead list drop down will be cleared. – FIXED
18. Timer: When timer is open for more than 20 minutes, user is not able to save it and gets session timeout. FIXED
19. Timer: When under Global Settings -Time & Expense - Smallest Time Increment for Start and Stop Time is set to “01:00”. Which was the cause of the error message to get generated.
20. Time Entry and Expense Log: Custom fields with type list were not displayed correctly. – FIXED
21. Project Center: User with “Manager Level Security” were seeing duplicate projects. This was UI issue – FIXED
22. Reviewer: When View By filter is set to Employee Groups or Project Groups or Vendor Groups or Client Groups the FROM and TO drop down will not get the group data. – FIXED
23. Reviewer: The close(X) button for memo was misaligned. - FIXED
24. Custom Invoices were not able to display data. – FIXED
25. Project: Expenses Part of Contract is being checked by default. – FIXED
26. Time Expense Screen's: Users are unable to make Time Entries and Expense entries using the Internet Explorer 11 browser. – FIXED
